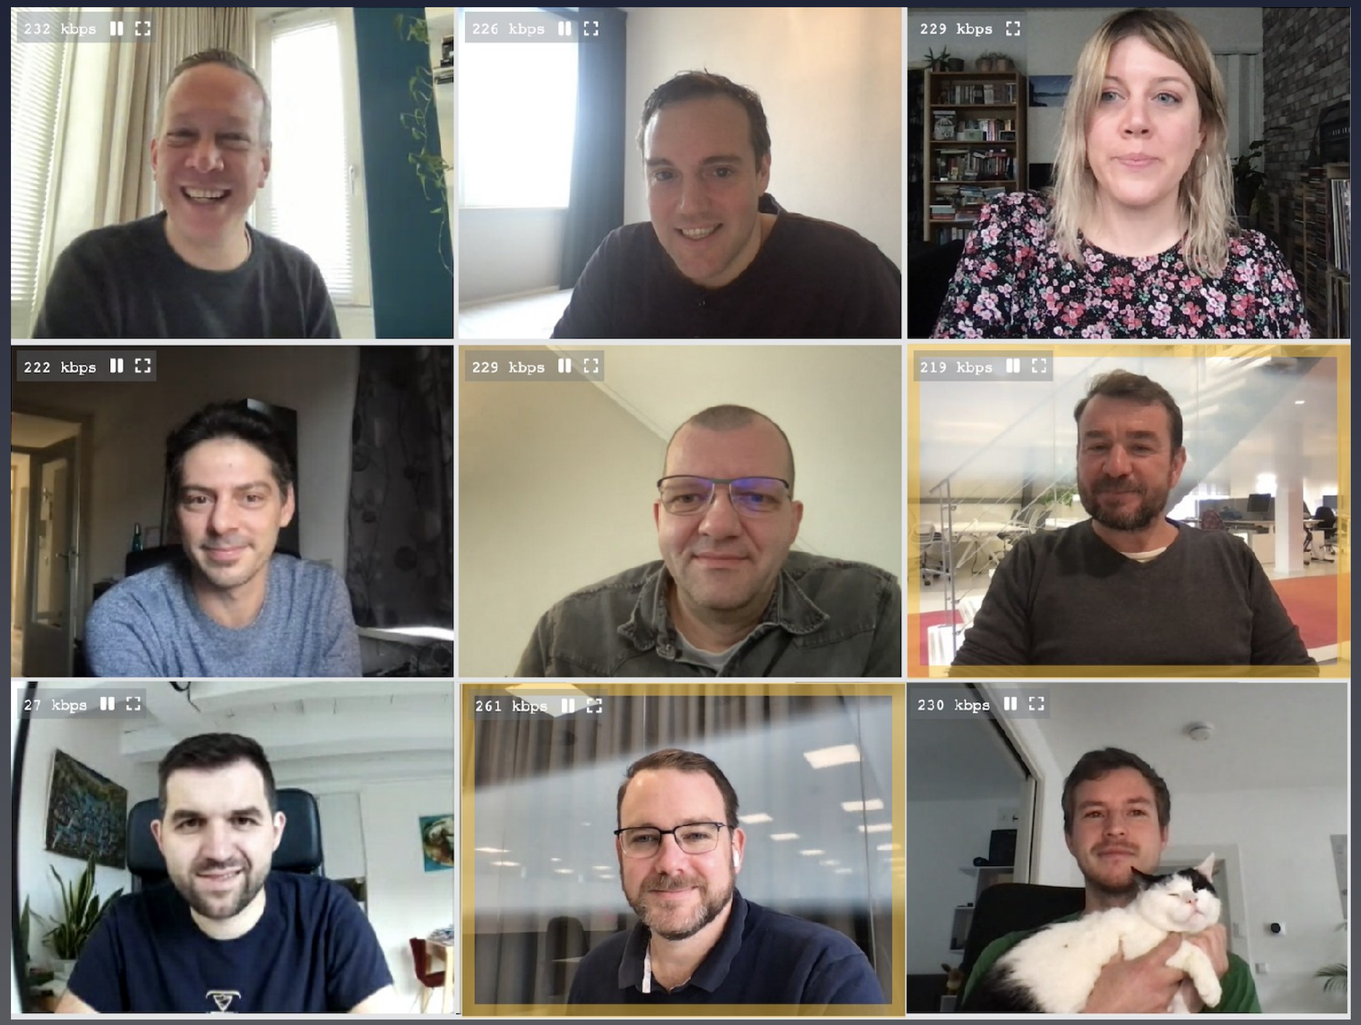
RIPE 83 Technical Report

Menno Schepers | RIPE 83 | 26 Nov 2021

The RIPE 83 Tech Team



Meetecho

- Our fourth virtual meeting using Meetecho
- We hope the next RIPE meeting can be hybrid where we combine the onsite meeting and Meetecho

Audio Issues

- Some Windows users reported audio issues
  - The 'autoplay policy' behaviour in Chrome & Firefox recently changed in Windows
  - Causing audio not to be played and unmuted
  - Meetecho team investigated the issue together with some participants and where able to isolate and fix the issue
  - Meetecho team implemented a fix on Monday evening

Audio Issues

- Microphone issues for certain Safari users
  - Some participants reported the inability to enable their microphone.
  - They received the error: ’audio track closed’
  - This is a known bug in Safari
  - Bug 230752: REGRESSION (Safari 15): Not sending over media after the initial negotiation
  - https://bugs.webkit.org/show_bug.cgi?id=230752

2FA for RIPE NCC Access

- During the Anti-Abuse 2FA was discussed
- We saw 8 users enable 2FA on their SSO account

Stenography

- StreamText enabled IPv6 a few months after RIPE 82
